

PRATEEK SINGH

Reporting Services & Enterprise BI Leader | Governance, Production Operations, Team Enablement

Lansing, MI (MSU Talent Ambassador) | prateek.singh22@outlook.com | +1 (517) 512-4813 |

LinkedIn: <https://www.linkedin.com/in/prateeksingh22> | Portfolio: <https://prateeks-viz.github.io/prateeksingh-portfolio>

PROFESSIONAL SUMMARY

BI and analytics leader with 9+ years building and governing enterprise reporting and advanced analytics environments across finance, operations, HR, sales, and learning. Owns Tableau platform governance as site administrator, coaches BI analysts and engineers, and partners directly with executives on dashboards used at the C-suite level. Multi-tool depth across Tableau, Power BI, IBM Cognos, SSIS, SSRS, Informatica, Snowflake, and Redshift. Background in higher education analytics, learning, and workforce data, and active campus engagement as an MSU Talent Ambassador. MBA candidate at Kelley School of Business (Strategy & Leadership).

CORE COMPETENCIES

Leadership & Management: Team coaching and mentorship, production operations management, change management, complex project leadership, resource and capacity planning, strategic planning, stakeholder management

BI & Analytics Platforms: Tableau (Server Administration), Power BI, IBM Cognos, Microsoft Fabric, SSIS, SSRS, SSMS, Qlik, Pentaho, Informatica, Snowflake, Redshift

Governance & Stewardship: Enterprise reporting governance, data stewardship, KPI standardization, metric definitions, access controls, QA/UAT, versioning, production BI support

Data & Warehousing: Data warehousing, ETL pipelines, Azure Data Factory, Azure Databricks, Oracle, IBM Db2, Redshift, star/snowflake schemas, descriptive and prescriptive analytics

Enablement & Communication: BI curriculum design, Community of Practice facilitation, executive presentations, technical documentation, self-service analytics enablement

PROFESSIONAL EXPERIENCE

Senior Data Visualization & Analytics Engineer | Jackson National Life *Lansing, MI | Sep 2022 – Present*

- Lead BI subject-matter authority across Power BI and Tableau for an enterprise reporting environment serving finance, HR, operations, distribution, executive leadership, education, customer care, and document management.
- Own Tableau platform governance as site administrator for two enterprise sites - defined permissions, environment structure (dev / QA / production), and data stewardship practices across all data sources, flows, and workbooks.
- Strengthened production BI operations by building 5 Azure Data Factory pipelines and introducing versioning and change-management practices for the Tableau environment, reducing pipeline failures, refresh issues, and manual intervention by ~80%.
- Delivered executive-facing Power BI dashboards covering cost-breakdown structure and budget by department, business inflow/outflow performance, and audit reporting - partnering directly with senior leaders and VPs through bi-weekly and monthly C-suite demos.
- Drove dashboard rationalization across 100+ reporting assets, retiring overlapping content and improving reporting trust in the production environment.
- Coach and mentor a team of 7–8 BI analysts and engineers on Power BI, Microsoft Fabric, and reporting best practices; partnered with the internal training team to develop Power BI and Fabric curriculum.
- Co-lead the BI Community of Practice - bi-weekly office hours and monthly enablement sessions advising employees enterprise-wide on Power BI, Tableau, and visualization best practices.
- Represent Jackson at Michigan State University as Talent Ambassador, engaging students on analytics careers and strengthening the early-talent pipeline at MSU.

Business Analyst II | Red Hat, Inc.

Pune, India | Aug 2021 – Apr 2022

- Built Tableau reporting on a Redshift-backed data warehouse for North American sales and finance leadership - analyzing product performance, customer trends, recurring revenue, and expenditure patterns.
- Led a complex discoverability project - designed and shipped a Tableau landing dashboard powered by Tableau Server metadata and usage logs in Redshift, enabling keyword search across the enterprise reporting environment and eliminating dependence on multiple support teams to locate reports.
- Standardized KPI definitions and reporting logic across stakeholder groups, improving consistency in how business performance was measured and consumed.

- Partnered with data science / ML teams, translating model outputs into decision-ready Tableau views for senior leadership.
- Recognized with the Red Hat Multiplier Award and the Red Hat Team Advocate Award.

Technology Analyst | Infosys Limited

Pune, India | Dec 2016 – Aug 2021

- Led BI training and enablement at enterprise scale - delivered 800+ live and virtual sessions to 10,000+ professionals across Tableau, Power BI, IBM Cognos, SSIS, SSRS, SSMS, Informatica, Snowflake, Qlik, Pentaho, SQL, and MongoDB.
- Designed and delivered an enterprise reporting and data engineering solution for Infosys education and workforce data - ETL using SSIS / SSMS / SSRS and Power BI dashboards, consolidating training data across multiple business units into a single source of truth for senior leadership.
- Delivered Power BI dashboards on workforce readiness and people analytics (by location, business unit, bench status) to the CEO and division heads of Education and HR, with a weekly executive demo cadence.
- Authored 4 core BI learning modules for Infosys Lex (2 later extended into Springboard); coached 7 colleagues onboarding into the BI training organization.
- Served as production BI support SME across all taught platforms - owning environment health, assessments, troubleshooting, and technical consulting across concurrent training programs.
- Earned Infosys INSTA Awards (2018, 2020) for training innovation and analytics enablement.

EDUCATION

Indiana University – Kelley School of Business | MBA, Dean's Fellow

Expected Spring 2027
